RE: CG Docket No. 03-123

Federal Communications Commission (FCC)

445 Twelfth Street SW

Washington, DC 20554

Dear Chairman Martin, Commissioners Adelstein, Copps, McDowell, and Tate:

I am a deaf person and I use Video Relay Service (VRS) to communicate. I was appalled to learn that the FCC staff is intent on drastically cutting the VRS rate, and effectively cutting VRS availability for the deaf. Instead of seeking to limit the number of deaf people with VRS access, the FCC should do everything in its power to make VRS available to more deaf people.

I, along with other Deaf individuals, use these services in both my work and personal life. It is an important way in which I/we communicate with both hearing and deaf individuals. I urge you to do everything you can to make VRS service available to the many deaf people who currently do not have access to this vital, life-changing service.

The VRS rate should encourage the VRS providers to:

- Serve more deaf people, not discourage them from reaching out to more deaf people
- Provide interpreter training programs so that there will be an adequate number of qualified interpreters for VRS and the local Deaf communities
- Provide service and technology improvements, such as the development of new videophone equipment, fulfilling the Americans with Disabilities Act (ADA) mandate of functionally equivalent telecommunications services

I, along with other deaf individuals, their families and coworkers, depend on VRS and other relay services.

Please stop any VRS program cuts and fulfill the mandate of the Americans with Disabilities Act (ADA) to provide deaf people with functionally equivalent telecommunications services.

Sincerely,

To Chairman Martin;

I am a friend of a deaf person and I need Video Relay Service (VRS) in order to be able to communicate with him. I am writing to strongly urge the FCC to establish a new stable, reliable, and predictable VRS rate for the next 3 years. I know that a long term stable rate will directly impact the VRS services I rely on.

Dear Chairman of FCC: Kevin Martin

I would like you to know that most deaf peoples have videophone to use VRS to make better communicate w/ hearing peoples to be sure understand what VRS & deaf peoples to make clearly than TDD or TTY to make not clearly w/ NRS to use TTY or TDD w/ hearing peoples also sometime not to clearly to understand what they say ??

Please keep support on VRS & deaf people to use Video phone on "not cutting budget on VRS "in future..."

Thank you for support this: not cutting budget on VRS

To: Chairman Martin;
Commissioners Adelstein, Copps, McDowell, and Tate

I am Deaf and I need Video Relay Service (VRS) in order to be able to place and receive phone calls with hearing individuals in my own native language – American Sign Language (ASL). I am writing to strongly urge the FCC to establish a new stable, reliable, and predictable VRS rate for the next three years. I know that a long-term stable rate will directly impact the VRS services that I rely upon.

Please set a fair VRS rate that encourages VRS providers to:

- ☐ Increase VRS access for all Deaf individuals through outreach programs
- ☐ Invest in the training and development of additional professional interpreters
- ☐ Improve VRS technology to provide reliable 24/7 and 911 services

Cutting the VRS rate would severely impact the quality of VRS, which I rely on for my communication needs.

RE: CG Docker # 03-123

Dear Chairman Martin:

Both my husband and I are deaf. We use Video Relay Service (VRS) frequently almost daily to place and receive phone calls with hearing individuals. Our first language is American Sign Language (ASL) and that enables us to use it on VRS and understands clearly on our chats. For us this is easier then doing in writing.

We begged you to let VRS continue strongly. For VRS to continue, it needs to have ongoing stable, reliable and predictable VRS rate. Please set up fair VRS rate so we can continue to use it reliable. Fair rate is needed so it increase VRS access for us deaf individuals, continue the training of VRS professional interpreters as well improve VRS technology to provide us with reliable 24/7 and 911 services.

Cutting the VRS rate will severely impact the quality of VRS, which we relies on for our communications needs.

Respectfully,

James Cummins
